EDUCATION

Central Philippine University — BS in Software Engineering

August 2022 - June 2026

Iloilo National High School — Special Science Class / STEM

June 2016 - May 2022

EXPERIENCE

Allutional — Backend Engineer

October 2025 - PRESENT

I engineered robust server-side applications using Express.js and Node.js to ensure low-latency performance. My role involved managing deployment pipelines and conducting code reviews to reduce technical debt. I consistently optimized backend logic to meet strict sprint deliverables on time.

Inertia Ltd. — Junior Software Developer

July 2025 - October 2025

I led full-stack development tasks while collaborating on project planning to align features with client goals. I executed comprehensive QA testing protocols to identify edge cases before release. This ensured stable, bug-free deployments for both web and mobile platforms.

PROJECTS

Click-click Photobooth — Cafe Photobooth

Developed the full-stack infrastructure, collaborated with the client from concept to system deployment in their physical store.

Falsisters POS — Retail Management Ecosystem

Developed a unified retail solution comprising a mobile POS application and a robust back-office system, digitizing inventory tracking and sales management for specialized rice trading operations.

CERTIFICATIONS & AWARDS

Iloilo Province Hackathon
2025 - 3rd Place Winner

GameON! Game Development
Hackathon - Participant

BayloCentral & NexLock -
CPUGAD Startup Incubatees

SKILLS

Backend: NestJS, Node.js,
Python, RESTful API,
Microservices.

Frontend & Mobile: Flutter
(Dart), Next.js, React, Tailwind
CSS.

Database: PostgreSQL, Prisma
ORM, TypeORM, Optimization.

DevOps & Cloud: AWS,
Supabase, Docker, CI/CD,
Linux, Cloud Deployment.

AI & Emerging Tech: OpenAI
API, IoT (Raspberry
Pi/Sensors), Computer Vision.

Soft Skills: Teamwork,
Leadership, Time Management,
Decision Making.
